Hello Ed and Shahid:

Can you forward me the spreadsheet in question please.

There is an apparent one row shift for the total data in Column Q on the spreadsheet. I apologize for my type in my message below where I misspelled shift.

Importance: High

Josh and Dana,

Please see Ed Hathaway's message below as there may be an error on the attached spreadsheet from EPA's website on the Gold King Response. Column Q may be off for not only Lead but also Zinc which shows up as Zero. Column Q also has numbers that I am wondering about for total cadmium, arsenic, and nickel. Maybe it is just a spreadsheet error. Could we please check with the Region. Thanks!

Shahid,

Not sure if you can address this. The attached spreadsheet is on the EPA website for the Gold King response. Column Q row 43 shows lead as 8,700 ug/l. There is obviously a row shift for that column in the spreadsheet. The sample ID is ADW-021-150810-11. Would not want the news reporting 8 ppm of lead in the water.

Not sure if you can get this message to someone who can correct the spreadsheet.

Ed
